# Almonty sets new highs, Q3 preview, PT up, BUY

### BUY (BUY)

Target price EUR 62.00 (53.00)
Current price EUR 48.90
Up/downside 26.8%

#### What's it all about?

Deutsche Rohstoff's stake in Almonty Industries (9.5% plus convertibles) has surged in value to over EUR 150m following Almonty's 600%+ YTD share price rally. This was driven by the upcoming start of tungsten production at Almonty's high-grade Sangdong Mine in South Korea and growing interest in non-Chinese supply sources amid geopolitical tailwinds. This holding now accounts for roughly 70% of Deutsche Rohstoff's market cap and 40% of its EV. Ahead of Q3 results on 19 November, we expect the backend-loaded drilling program of H1 to lead to a sequential improvement in production in Q3, and commensurate increases in revenues, EBITDA and EPS. This could set the stage for a FY25 guidance tightening toward the upper end of the range. Reflecting the revaluation of Almonty, we raise our price target to EUR 62.00 (from EUR 53.00) and reiterate our BUY rating.

#### Almonty sets new highs, Q3 preview, PT up, BUY

Value of Almonty stake exceeds EUR 150m. Deutsche Rohstoff holds a significant stake in Almonty Industries (ALI:GR), a company involved in mining, processing and shipping tungsten concentrates. Almonty's share price has increased by more than 600% year-to-date in EUR, driven by operational milestones and powerful geopolitical and market tailwinds. The primary driver is the imminent commencement of tungsten mining at the flagship Sangdong Mine in South Korea in Q4 of this year, which, due to its scale and high grade, is a major revenue catalyst. This establishes Almonty as a leading, reliable non-Chinese supplier of tungsten, a critical mineral for defense, and has led to widespread speculation about a potential US government equity stake. Deutsche Rohstoff holds 20.6m shares in Almonty, representing 9.5% of its share capital, as well as convertibles and a loan. We estimate the current value of the stake to be in excess of EUR 150m, contributing around 70% to the market capitalization and around 40% to the enterprise value of Deutsche Rohstoff.

Q3 expected to improve sequentially. Deutsche Rohstoff will publish its Q3 results on 19 November. The previous quarter (Q2) was characterized by relatively low production figures, as the drilling programme was back-end loaded, with four Niobrara wells brought into production only at the end of June. We expect these to have contributed to Q3 production, which should increase sequentially. We expect the realized price per BOE to remain roughly unchanged, leading to revenue estimates of around EUR 46m (+7% quarter-on-quarter, -22% year-on-year), EBITDA of EUR 30m (margin 65%, up 2 percentage points sequentially) and EPS of EUR 0.93. Based on these results, there is a chance that Deutsche Rohstoff will tighten its FY25 guidance at the upper end of the current sales range of EUR 170–190m and EBITDA range of EUR 115–135m, and there is even a slight chance of an upgrade of the upper bound.

PT up for Almonty, BUY. We refine our estimates and adjust our valuation to reflect the increased value of the Almonty stake. To account for the volatility of the Almonty share price, we apply a 20% discount to the current value. This results in a new price target of EUR 62.00 (previously EUR 53.00) for Deutsche Rohstoff, clearly confirming our BUY recommendation.

#### **Major Shareholders**

## SWOT analysis

#### Strengths

- · Experienced and successful management
- Massive oil reserves and cash flows in Wyoming
- Strong technical expertise
- Strategic partnerships

#### Weaknesses

- Volatile commodity prices
- · Limited financial resources and visibility in capital markets

#### **Opportunities**

- High population growth and low demand per capita for oil in developing countries
- Russian sanctions lead to more US oil and gas exports
- Benefit from tungsten demand through investment of nearly EUR 30m in tungsten producer Almonty Industries
- Early-stage activities in battery minerals like lithium

#### **Threats**

- Volatile oil and gas prices
- · Oil exploration and production, transport accidents
- Cost inflation (materials, personnel, financing)
- Volatile EUR/USD exchange rate
- Risks in junior mining investments where metals can't be economically extracted

### Valuation

#### **DCF Model**

The DCF model results in a fair value of EUR 62.01 per share:

**Top-line growth**: We expect Deutsche Rohstoff AG to grow revenues at a CAGR of -2.4% between 2025E and 2032E. The long-term growth rate is set at -10.0%.

**ROCE**. Returns on capital are developing from 11.0% in 2025E to 10.4% in 2032E.

**WACC**. Starting point is an average asset beta for companies in the US oil and gas sector of 1.09. Combined with a risk-free rate of 2.0% and an equity risk premium of 6.0% this yields cost of equity of 13.5%. With pre-tax cost of borrowing at 6.0%, a tax rate of 25.0% and target debt/equity of 1.0 this results in a long-term WACC of 9.0%.

#### FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR 64.81 per share based on 2025E and EUR 85.74 per share on 2029E estimates.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in E	URm	2025E	2026E	2027E	2028E	2029E

Source: Company data; mwb research

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 7.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable.** A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.

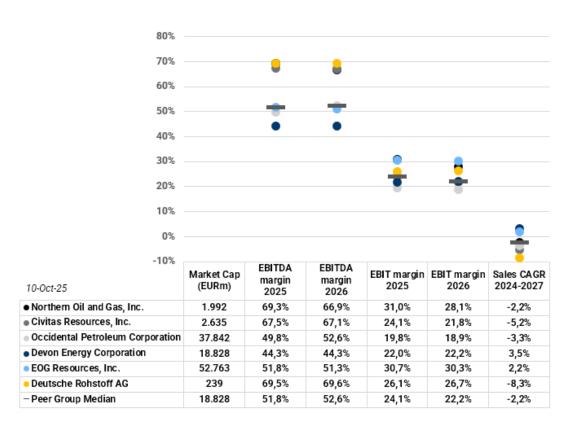

#### Peer group analysis

A peer group or comparable company ("comps") analysis is a methodology that calculates a company's relative value — how much it should be worth based on how it compares to other similar companies. Given that **Deutsche Rohstoff AG** differs quite significantly in terms of size, focus, financial health and growth trajectory, we regard our peer group analysis merely as a support for other valuation methods. The peer group of Deutsche Rohstoff AG consists of the stocks displayed in the chart below. As of 10 October 2025 the median market cap of the peer group was EUR 18,827.8m, compared to EUR 239.4m for Deutsche Rohstoff AG. In the period under review, the peer group was less profitable than Deutsche Rohstoff AG. The expectations for sales growth are higher for the peer group than for Deutsche Rohstoff AG.

#### Peer Group - Key data

Source: FactSet, mwb research

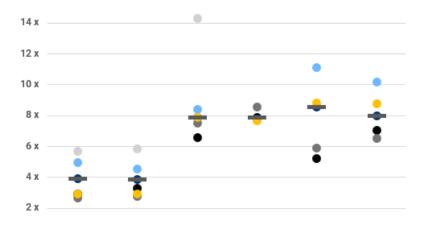

Comparable company analysis operates under the assumption that similar companies will have similar valuation multiples. We use the following multiples: EV/EBITDA 2025, EV/EBITDA 2026, EV/EBIT 2025, EV/EBIT 2026, P/E 2025 and P/E 2026.

Applying these to Deutsche Rohstoff AG results in a range of fair values from EUR 44.72 to EUR 74.45.

### Risk

The chart displays the **distribution of daily returns of Deutsche Rohstoff AG** over the last 3 years, compared to the same distribution for Northern Oil and Gas, Inc.. We have also included the distribution for the index Germany SDAX. The distribution gives a better understanding of risk than measures like volatility, which assume that log returns are normally distributed. In reality, they are skewed (down moves are larger) and have fat tails (large moves occur more often than predicted). Also, volatility treats up and down moves the same, while investors are more worried about down moves. For Deutsche Rohstoff AG, the worst day during the past 3 years was 09/04/2025 with a share price decline of -9.3%. The best day was 10/02/2025 when the share price increased by 9.6%.

### Conflicts of interest

Disclosures regarding research publications of mwb research AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures It is essential that any research recommendation is fairly presented and discloses interests of indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if mwb research AG

- (1) or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the term of such an agreement,
- or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of mwb research AG or its affiliate(s),
- (5) or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure
Deutsche Rohstoff AG	2, 8

### Important disclosures

- 1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by mwb research AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of mwb research AG. Reproduction of this document, in whole or in part, is not permitted without prior permission mwb research AG. All rights reserved. Under no circumstances shall mwb research AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report - neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.
- 2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.
- 3. Organizational Requirements mwb research AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of mwb research AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.
- 4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow - DCF model. Furthermore, a peer group comparison is made. The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at https://www.mwb.-research.com.

mwb research AG uses the following three-step rating system for the analyzed companies:

- Speculative (Spec.) BUY: Sustainable upside potential of more than 25% within 12 months, above average risk
- BUY: Sustainable upside potential of more than 10% within 12 months
- SELL: Sustainable downside potential of more than 10% within 12 months.
- HOLD: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of mwb research AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by mwb research AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of mwb research AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

### 5. Date and time of first publication of this financial analysis 10-Oct-25 09:20:02

#### 6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no
  or very little actual trading there and that published prices are not based on
  actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.
- **7. Major Sources of Information** Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. mwb research AG has checked the information for plausibility but not for accuracy or completeness.
- **8. Competent Supervisory Authority** mwb research AG are under supervision of the BaFin German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.
- **9. Specific Comments for Recipients Outside of Germany** This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.
- 10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under https://www.mwb.-research.com...
