What's it all about?

Deutsche Rohstoff has published FY25 audited results, confirming the early-March prelims which exceeded expectations at the time of publication. Deutsche Rohstoff significantly boosted liquidity and will share its success with shareholders in the form of a proposed dividend increase to EUR 2.25 per share (+13%) and a new share buyback program of up to EUR 7.5m. Looking ahead, the company reaffirmed its recently increased FY26 guidance and introduced an initial FY27 outlook supported by an accelerated drilling program. Its operational flexibility and strengthened cash position - including a EUR 100m gain from selling Almonty Industries shares - position it to capitalize on favorable oil prices. Reflecting upgraded FY27 estimates, we increase the price target to EUR 135.00 (old: EUR 129.00), implying roughly 50% upside. We confirm our BUY recommendation.

IMPORTANT. Please refer to the last page of this report for "Important disclosures" and analyst(s) certifications.

Prelims confirmed, upbeat FY27 guidance, est./PT up, BUY.

Final FY25 in line. Deutsche Rohstoff (DRO) has published its audited FY25 results, confirming the preliminary results released in early March. At the time, both revenue and EBITDA exceeded our estimates, with the former being above and the latter at the upper end of the guidance range. In FY25, Deutsche Rohstoff significantly strengthened its liquidity, with cash and cash equivalents rising by around EUR 50m. The company is sharing its financial success with investors by proposing to increase the dividend to EUR 2.25 per share, marking a 13% rise from the previous year. Furthermore, the company is enhancing shareholder returns by launching a new share buyback programme worth up to EUR 7.5m over the next twelve months.

FY 26 guidance confirmed, first FY27 outlook. Looking ahead, Deutsche Rohstoff has confirmed the recently increased guidance for FY26, supported by an accelerated drilling programme with projected investments of between EUR 215m and EUR 235m. The company has also issued initial guidance for FY27, based on 18 gross wells or approximately 15 net wells. We have upgraded our model to reflect this accelerated programme for FY27. Basing our oil price assumption on current futures prices leads to underlying WTI price assumption slightly below the base case (see the table on the next page).

PT up, confirm BUY. Due to its high operational agility, Deutsche Rohstoff is uniquely positioned to capitalize on the current oil price environment. Unlike its larger, more rigid competitors, Deutsche Rohstoff has proven its ability to rapidly increase production. The company recently contracted a third drilling rig, which will almost double its net well count for 2026. This 'on-off' flexibility enables Deutsche Rohstoff to bring new production online precisely when WTI crude trades in the USD 90–95 range, which is well above their base-case assumptions. This organic growth is further boosted by the recent EUR 100m gain from the sale of Almonty Industries shares, which provides a substantial cash reserve to fund this aggressive drilling expansion without putting pressure on the balance sheet. With our upgraded FY27 estimates, we have arrived at a new price target of EUR 135.00 (previously EUR 129.00), offering around 50% upside and providing robust support for our BUY recommendation.

SWOT analysis

Strengths

- Experienced and successful management
- Massive oil reserves and cash flows in Wyoming
- Strong technical expertise
- Strategic partnerships

Weaknesses

- Volatile commodity prices
- Limited financial resources and visibility in capital markets

Opportunities

- High population growth and low demand per capita for oil in developing countries
- Russian sanctions lead to more US oil and gas exports
- Benefit from tungsten demand through investment of nearly EUR 30m in tungsten producer Almonty Industries
- Fossil bottlenecks due to Iran war

Threats

- Volatile oil and gas prices
- Oil exploration and production, transport accidents
- Cost inflation (materials, personnel, financing)
- Volatile EUR/USD exchange rate
- Risks in junior mining investments where metals can't be economically extracted

Valuation

DCF Model

The DCF model results in a **fair value of EUR 135.27 per share**:

Top-line growth: We expect Deutsche Rohstoff AG to grow revenues at a CAGR of -6.1% between 2026E and 2033E. The long-term growth rate is set at -10.0%.

ROCE. Returns on capital are developing from 36.0% in 2026E to 8.2% in 2033E.

WACC. Starting point is an average asset beta for companies in the US oil and gas sector of 1.09. Combined with a risk-free rate of 2.0% and an equity risk premium of 6.0% this yields cost of equity of 13.5%. With pre-tax cost of borrowing at 6.0%, a tax rate of 25.0% and target debt/equity of 1.0 this results in a long-term WACC of 9.0%.

FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR 378.45 per share based on 2026E and EUR 145.29 per share on 2030E estimates.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in EURm	2026E	2027E	2028E	2029E	2030E
EBITDA	322.4	208.1	181.2	166.9	151.3

Source: Company data; mwb research

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 7.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable. A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.**

Peer group analysis

A peer group or comparable company (“comps”) analysis is a methodology that calculates a company’s relative value – how much it should be worth based on how it compares to other similar companies. Given that **Deutsche Rohstoff AG** differs quite significantly in terms of size, focus, financial health and growth trajectory, we regard our peer group analysis merely as a support for other valuation methods. The peer group of Deutsche Rohstoff AG consists of the stocks displayed in the chart below. As of 23 April 2026 the median market cap of the peer group was EUR 36,624.9m, compared to EUR 429.2m for Deutsche Rohstoff AG. In the period under review, the peer group was less profitable than Deutsche Rohstoff AG. The expectations for sales growth are higher for the peer group than for Deutsche Rohstoff AG.

Peer Group – Key data

23-Apr-26

Comparable company analysis operates under the assumption that similar companies will have similar valuation multiples. We use the following multiples: EV/EBITDA 2026, EV/EBITDA 2027, EV/EBIT 2026, EV/EBIT 2027, P/E 2026 and P/E 2027.

Applying these to Deutsche Rohstoff AG results in a range of fair values from EUR 124.55 to EUR 328.30.

Risk

The chart displays the **distribution of daily returns of Deutsche Rohstoff AG** over the last 3 years, compared to the same distribution for Northern Oil and Gas, Inc.. We have also included the distribution for the index Germany SDAX. The distribution gives a better understanding of risk than measures like volatility, which assume that log returns are normally distributed. In reality, they are skewed (down moves are larger) and have fat tails (large moves occur more often than predicted). Also, volatility treats up and down moves the same, while investors are more worried about down moves. For Deutsche Rohstoff AG, the worst day during the past 3 years was 17/10/2025 with a share price decline of -9.5%. The best day was 13/10/2025 when the share price increased by 10.6%.

Conflicts of interest

Disclosures regarding research publications of mwb research AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures. It is essential that any research recommendation is fairly presented and discloses interests of or indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if mwb research AG

- (1) or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the term of such an agreement,
- (4) or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of mwb research AG or its affiliate(s),
- (5) or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure
Deutsche Rohstoff AG	2, 8

Important disclosures

1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by mwb research AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of mwb research AG. Reproduction of this document, in whole or in part, is not permitted without prior permission mwb research AG. All rights reserved. Under no circumstances shall mwb research AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organizational Requirements mwb research AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of mwb research AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made. The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at <https://www.mwb.-research.com>.

mwb research AG uses the following three-step rating system for the analyzed companies:

- **Speculative (Spec.) BUY:** Sustainable upside potential of more than 25% within 12 months, above average risk
- **BUY:** Sustainable upside potential of more than 10% within 12 months
- **SELL:** Sustainable downside potential of more than 10% within 12 months.
- **HOLD:** Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of mwb research AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by mwb research AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of mwb research AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Date and time of first publication of this financial analysis
23-Apr-26 10:30:53

6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no or very little actual trading there and that published prices are not based on actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.

7. Major Sources of Information Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. mwb research AG has checked the information for plausibility but not for accuracy or completeness.

8. Competent Supervisory Authority mwb research AG are under supervision of the BaFin – German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.

9. Specific Comments for Recipients Outside of Germany This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.

10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under <https://www.mwb.-research.com>.
