Deutsche Rohstoff AG: Cub Creek commences production from Haley pad

Mannheim. Cub Creek Energy (CCE) has started producing oil and gas from its Haley Pad. Seven horizontal wells were drilled in April and May and completed from July to September. Cub Creek's working interest in these wells is 78 %. The company will report the results of the first 30 days of production in the second half of October.

Drilling of 16 horizontal well at the company's Litzenberger Pad was completed on 10 September 2017. Cub Creek Energy expects to start producing from these wells in the first quarter of 2018.

Mannheim, 13 September 2017

Deutsche Rohstoff identifies, develops and divests attractive resource projects in North America, Australia and Europe. The focus is on the development of oil and gas opportunities within the United States. Metals, such as gold, copper, rare earth elements, tungsten and tin complete our portfolio.
